Jordan Bryant

Corpus Christi, TX | +1 720 525 6845 | jordanbryantusaf@gmail.com

Professional Summary

Accomplished Designer and Drafter with 10 years of fully remote, multi-disciplinary experience across civil, structural, MEP, architectural, mechanical, solar, and petroleum sectors. Expert in 13 CAD platforms, project management, and workflow automation. Led teams of up to 8 licensed engineers, managed 160+ billable hours weekly, and developed custom LISP routines to boost design efficiency by over 80%.

Work Experience

Senior Remote Drafter/Designer

Caddlabz

May 2019

• Led design projects from concept to completion, ensuring adherence to client specifications and achieving high client satisfaction.

• Provided technical support and guidance to junior team members, improving team performance and project delivery.

• Achieved consistently high client satisfaction ratings by delivering exceptional design quality across multidisciplinary projects.

• Managed multidisciplinary projects in MEP, Civil, Structural, and Architectural fields, ensuring comprehensive solutions.

• Oversaw finance, hiring, client acquisition, server maintenance, website design, QAQC, city/county correspondence, and code compliance, ensuring seamless company operations.

• Reduced design time from 2-3 business days to 15-20 minutes and increased utilization rate to 93% by writing LISP routines.

• Trained engineers on AutoCAD, Civil 3D, Solidworks, Revit, Navisworks, Microstation, Open Roads, Water CAD, Inventor, Fusion 360, and Rhino 7, enhancing team technical capabilities.

• Grew company to 8 fully licensed engineers generating 160+ billable hours weekly within two years, resulting in solid profit prior to sale.

Remote Drafter/Designer

EN Engineering

May 2015 to December 2020

• Developed detailed technical drawings and plans using AutoCAD and Revit, ensuring accuracy and compliance with project requirements.

• Collaborated with engineers and architects to ensure precise design specifications, contributing to successful project outcomes.

• Managed multiple projects concurrently while meeting strict deadlines, demonstrating strong organizational and time management skills.

• Contributed to major VA projects, including Stevenson Air Force Base and Cape Canaveral National Cemetery, by designing a 400+ page plan set for a 60-acre expansion, coffer dam, and pond, ensuring QAQC standards were met and project acceptance achieved.

Remote Drafter/Designer
Tetra Tech
January 2016 to January 2020

• Utilized SolidWorks and civil software for 3D modeling and rendering, enhancing design visualization and project presentations.

• Conducted quality control checks on all drafts and designs, ensuring accuracy and compliance with project standards.

• Streamlined workflow processes, improving overall project efficiency and reducing turnaround times.

• Managed multidisciplinary projects in PV Solar, structural, mechanical, and electrical fields, delivering integrated solutions.

• Developed a program that grades entire site plans in 30 seconds to 5 minutes, significantly accelerating project timelines.

• Created a program to accurately calculate PV solar electrical distribution network parameters, enabling precise adjustments and improved system performance.

• Managed a team of 4 fully-remote drafters, coordinating project tasks and maintaining high productivity.

Education

Entrepreneurship and Finance Management (focused) (Master of Business Administration)
University of Denver | Remote
January 2025 to Present

I'm getting an MBA and renewing my PMP so I can be taken a bit more seriously in the industry and work my way up the ladder to an executive level CAD/Project Management position.

Engineering Technology (Bachelor of Science)
University of Colorado Denver
January 2016 to December 2018

I graduated with honors in under two years.

Dean's List, National Honors Society.

Engineering Technology (Associate Degree)
Community College of Denver
January 2014 to December 2016

I technically finished this degree in a year, but I had to take a CLEP test on communication (I was already working and just had one course left. I speak English natively and have been able to talk since I was 11 months old. So, I have no idea why I had to take Communication. Haha)

Bachelor's degree

Trade school
